

Creek County Rural Water District #7  
P.O. Box 318  
Mounds OK 74047-0318

Violation of drinking water. Non urgent. You have the right to know what happened and what to do. Levels of haloacetic acid (HAA5) were above standard. We monitor contaminants in our water. Our results we received for the 4th quarter 2024 test exceeded the standard level. Standard is 0.060 mg/l. Our results were 0.064 mg/l. There's nothing to do unless you have a compromised immune system, an infant, or if you're elderly, seek advise from your Dr. What happened? Corrections? Resolved? Received test results late. Chemical adjustments were made, will retest. Questions?
